Agricultural Machinery

Parlayan Agricultural Machinery, the foundation of which was laid in 1967 by Hacı Mustafa ZINGIL, has taken over the leadership from Hacı Mustafa Bey to the second generation today. The flag, now taken over by A. Nuri ZINGIL and Eray ZINGIL, is being carried forward without compromising the philosophy of honesty and quality.

With years of experience in Agricultural Tools, Plant Protection Tools, and Equipment, Parlayan Agricultural Machinery offers an extensive product range in the field of Plant Protection, providing support to farmers worldwide with Field Sprayers, Turbo Atomizers, and Garden Atomizers, contributing to the development of agricultural mechanization and plant protection.

Since 1967, Parlayan Agricultural Machinery has been serving its customers with enthusiasm for always producing better and higher quality, maintaining integrity, and with its productive and experienced team.

The raw materials and spare parts used in our products are sourced from some of the world's leading companies, ensuring certified and high-quality products.

We would like to express our gratitude to everyone who has contributed to our journey as Parlayan Agricultural Machinery.

Master Rot Mower

Ultimate Precision in Soil Pulverization

Designed for cultivating the base of trees in fruit orchards, the Parlayan Master Rot Mower offers the most effective solution for soil fragmentation. Thanks to its horizontal rotavator blade structure, this machine doesn't just touch the soil; it transforms it.

The distinct advantage of the Master Rot Mower is its superior ability to shatter the soil. Powerful blades operating on a horizontal axis pulverize the soil, breaking it down to its finest particles. This is widely recognized as the best and most efficient method for soil tillage. This fine and loose soil texture allows tree roots to breathe more easily while maximizing water permeability.

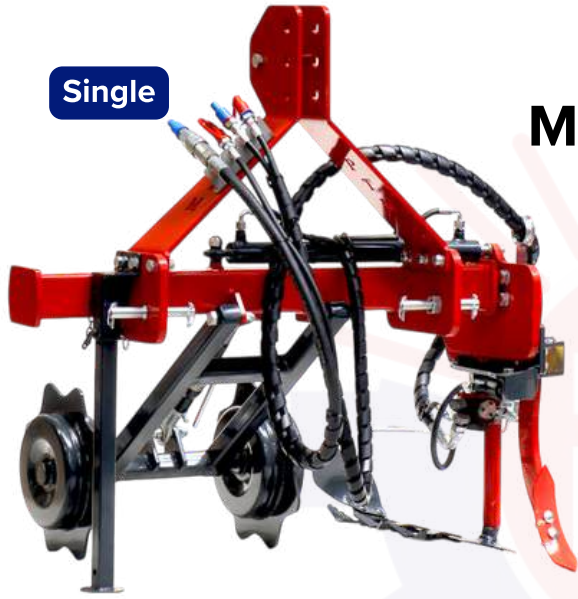

Delivering unique performance specifically around the trunks of fruit trees, the Master Rot Mower also effectively clears unwanted weeds by shredding them at the root. For obtaining a smooth ground surface in your orchard while maintaining tree health, the Master Rot Mower is the professional's choice.

Automatic Hoeing Machine

Parlayan Agricultural Machinery Dual-Sensor Hoeing Machine offers high efficiency and precision in vineyard maintenance. Equipped with sensors on both the right and left sides, it can hoe both sides of the vineyard rows simultaneously. Additionally, with the cultivator attachment, it can till the middle section of the vineyard, providing comprehensive soil preparation. Its hydraulic structure allows easy adjustment of the working width, while special blades aerate the soil, promoting root development and removing weeds. The dual-sensor system detects vineyard posts or tree roots, automatically retracting the blades to prevent damage, ensuring safe and efficient hoeing. This innovative technology saves time and labor costs while contributing to the healthy growth of vineyards.

Vertical
Rotovator

Parlayan Master vRot Mower delivers thorough soil tillage with its innovative vertical axis design. Operating on both sides simultaneously, it provides significant time and fuel savings for your orchard.

It perfects the soil in a single pass through a two-stage process:

- Pre-Preparation & Cutting: A sensor-equipped front blade safely navigates around trees, breaking the ground and uprooting coarse weeds.
- Fine Tillage & Mixing: A vertical rotavator with three specially angled blades immediately follows, pulverizing the loosened soil and weeds into a fine, cotton-soft powder.

This powerful combination effortlessly clears the most stubborn weeds, ensuring no spot in your orchard is left untouched.

Dual Trimmer

Master Cleaner

Weed Cutter

Combating unwanted weeds at tree bases and between rows has never been this safe and effective. The Parlayan Master Cleaner utilizes specially developed high-speed string technology to shred and remove weeds right from the base, without causing any damage to tree trunks.

Offering a natural and powerful alternative to chemical herbicides, Master Cleaner prevents weeds from competing for essential water and nutrients. This ensures your trees derive maximum benefit from the soil. The result? More vibrant, durable, and high-quality crops with greater market value.

We offer two configurations tailored to your orchard's needs:

- **Parlayan Master Cleaner (Single):** A compact solution for narrow spaces and tree bases requiring precise maneuvering.
- **Parlayan Master Cleaner (Double):** The high-performance model that cleans tree bases on both sides of the row in a single pass, providing significant savings on time and labor in large orchards.

Master Star Mower

Dual Power in Soil Tillage: Hoeing and Mowing Combined

The Parlayan Master Star Mower combines hoeing and weed mowing into a single, efficient pass for vineyards and orchards. Front discs till the soil and shred weeds, while rear star rollers pulverize and level the ground. This 2-in-1 action improves soil aeration, water retention, and root growth, perfectly prepping your land.

Master Disc Mower

Cutting-Edge Power in Soil Tillage

The Parlayan Master Disc Mower utilizes specialized rotating discs and precision sensors to safely cultivate soil around trunks without causing damage. Instead of merely scraping, it cuts and shreds the earth for superior weed control and aeration. Customizable in 2-disc, 3-disc, single, or double-sided configurations, it perfectly crumbles the soil to boost water retention and maximize your yield.
